

SHOHIDUL ISLAM ARIF BILLAH

Mobile Application Developer (Flutter & Dart)

Kazipara, Dhaka Division, Bangladesh | shohidulislamarifbillah@gmail.com | 01837845138 | [LinkedIn](#)

PROFILE

Mobile Application Developer with 1+ years of experience building and optimizing Flutter and Dart apps for Android and iOS. Skilled in GetX, Provider, Clean Architecture, and REST API integration. Experienced in end-to-end app publishing on Google Play Console and App Store Connect, focusing on high-performance UI/UX and AI integrations.

EDUCATION

Northern University Bangladesh BSc in Computer Science & Engineering (2026 - Present)

Lakshmipur Polytechnic Institute | 2022 - Dec 2025

Diploma in Engineering (Computer Science & Technology) (3.44 CGPA)

Mayura High School | 2021

Secondary School Certificate (4.28)

TECHNICAL SKILLS

- **Languages & Core Frameworks:** Dart, Java, OOP, Flutter, GetX, Provider
- **Architecture & Backend:** MVC, Clean Architecture, Performance Optimization, REST APIs, WebSockets, Firebase
- **App Deployment & Publishing:** End-to-End App Publishing, Google Play Console, App Store Connect, TestFlight, App Signing & Release Management
- **Payments & Tools:** RevenueCat, Stripe, Git, GitHub, Android Studio, VS Code, Postman, Figma

PROFESSIONAL WORK EXPERIENCE

Sparktech IT Limited | Dhaka, Bangladesh | Junior Flutter Developer | December 2025 – Present

- **Cross-Platform Development:** Engineered and delivered responsive, high-performance Flutter and Dart mobile applications for Android and iOS using MVC architecture and GetX state management.
- **AI Team Collaboration:** Collaborated closely with the MindMatrix AI team to integrate intelligent features, personalized recommendation engines, and REST APIs, enhancing user engagement across production projects.

Performance & Quality: Optimized app rendering speeds and API call efficiency, leading to smoother UI transitions, improved state synchronization, and reduced crash rates in production environments.

Industrial Attachment | BDCalling IT | September 2025 – December 2025

Completed intensive training on industry-standard Flutter workflows.

PROJECTS

Virtual Garage by Motor Bridge | Flutter, GetX, Node.js, MVC | [Play Store](#)

- **Vehicle Tracking:** Automated MOT, tax, and insurance tracking using vehicle registration APIs.
- **Automated Alerts:** Set up smart notifications for document renewals and service dates.
- **Document Vault:** Built a secure repository for vehicle logs, insurance, and maintenance records.
- **Architecture:** Used GetX and MVC architecture to manage data flow between Flutter and Node.js.
- **Monetization:** Implemented subscriptions for detailed vehicle reports and fleet management.

Artisan (Service Marketplace App) | Flutter, GetX, Firebase, MVC

- **Service Marketplace:** Built an on-demand booking platform connecting users with local skilled workers.
- **Real-Time Booking:** Developed a dynamic flow for browsing categories, viewing profiles, and scheduling.
- **Location Search:** Integrated Google Maps and Geolocation for proximity-based provider search.

- **Custom UI/UX:** Designed intuitive custom Flutter widgets to enhance app navigation.
- **Data & State:** Used Firebase for real-time synchronization and GetX for responsive state management.

Rise – AI Productivity & Mindfulness Coach | Flutter, GetX, REST API, Firebase

- **Integrated AI chatbot** for automated productivity coaching and interactive journaling.
- **Added in-app subscriptions and paywalls** using RevenueCat.
- **Implemented FCM push notifications** for daily habit reminders.
- **Created real-time goal, task, and habit tracking dashboards** with GetX.
- **Integrated REST APIs and social authentication flows.**

ZeusTucker (Fitness AI & Coach Management) | Flutter, GetX, REST API

- **Multi-Role Portal:** Designed dual interfaces for coaches to manage workout and diet modules.
- **Progress Tracking:** Built real-time daily checklists and data visualizations for user consistency.
- **AI Content Generation:** Added AI modules to generate personalized motivational stories and schedules.
- **Automated Refresh:** Enabled automated weekly client portal refreshes with manual content options.

Meetvide (Event Management & Social Platform) | Flutter, GetX, Stripe

- **Event Management:** Created a platform for scheduling and hosting free/paid events with AI-based location tracking and capacity tracking.
- **Payments:** Integrated Stripe for ticketing and automated host payouts.
- **Social Features:** Added real-time messaging and direct invitations to boost user engagement.
- **State Management:** Utilized GetX for smooth navigation and live data updates.
- **Account Security:** Implemented verification flows to maintain platform safety.
